

Morro™ Soluble Film.

Morro™ Soluble Film is a plant-based replacement for traditional water soluble films. Conventional dishwasher tablets and laundry pods rely on 'soluble' plastic wrappings to protect them in storage or transit. Morro Soluble Film is a natural, plastic-free replacement that keeps dishwasher tablets and laundry pods ready-to-use with a more sustainable alternative. Offering the necessary functional properties, the packaging can be dissolved in hot or cold water after use, leaving nothing behind. Morro materials are a drop-in solution. That means no changes are required to machinery or manufacturing processes to use our material.

Our material is:

- ✓ Plant-based
- ✓ Heat or solvent sealable
- ✓ 100% plastic free
- ✓ Fully biodegradable and home compostable

We all want to live without harming the planet. Morro makes it simple. Plastic free materials that are strong, natural and fully biodegradable that eliminate the most polluting plastics for a better tomorrow. A high-performing, drop-in solution that puts the power to do good in everyone's hands.

Choose the Planet.
