

# morro™

## Morro™ Nutri.

Morro™ Nutri is a breakthrough for food and drink fortification, delivering additional health benefits in the products you already know and love. Using micro-packaging technology, Morro Nutri protects vitamins and nutrients from degradation caused by pH, UV light and heat shock. This is achieved by encapsulating microscopic droplets of vitamins and nutrients in our plant-based material. The protective shell also ensures that the nutrient survives digestion in the stomach, and is released in the small intestine, optimising the health benefits for consumers.

### Our material is:

- ✓ Vegan plant-based
- ✓ Shelf stable
- ✓ Fortifies vitamins against degradation
- ✓ Edible and digestible, enabling enteric release

We all want to live without harming the planet. Morro makes it simple. Natural materials that are strong, natural and fully biodegradable that deliver advances in food and drink fortification. A high performing, drop-in solution that works with existing manufacturing processes and equipment that puts the power to do good in everyone's hands.

Choose the Planet.
